Profile

+3 years experience in Software development. Focused on creating innovative and efficient solutions that address complex challenges. Comfortable collaborating in multidisciplinary teams, have a strong commitment to continuous learning. My goal is to continue advancing professionally while contributing to the success of projects that positively influence the technological landscape.

Skills

Programming Python | TypeScript | JavaScript | C++ | Postgres | MongoDB | NoSQL | HTML | CSS.
Technologies Django | Flask | Celery | Redis | Pytorch | React | NextJs | Vue | AWS | Docker | Kubernetes | CI/CD | Git | Tailwind.
Soft Skills Time Management, Teamwork, Problem-solving, Documentation. | English- Advanced.

Work Experience

Python Developer

Level UP Technology / Ark

New York, USA

Nov 2023 - Current

- Led the design and development phase of API solutions adhered to best practices and standards, collaborating closely with stakeholders to gather requirements, ensuring scalability for future growth using the latest technologies of **Python, Flask, Docker, CI/CD, MongoDB, Vue**.
- Implemented performance optimization techniques, such as parallelism in the core process of the company ensuring high responsiveness and fault tolerance mechanisms making the **process 60% faster**.
- Demonstrated expertise in troubleshooting and debugging issues within Flask APIs, implementing **effective error handling mechanisms** and logging strategies, enhancing visibility into API operations and facilitating proactive issue resolution.
- Developed Flask APIs that effectively **handled large volumes of data** and concurrent requests, ensuring optimal performance under high loads utilizing asynchronous processing to enhance scalability and responsiveness of API endpoints

Software Developer

Bitmaker

Arequipa, Perú

Apr 2022 - Sept 2023

- Implemented critical features and performance enhancements on the backend side, contributing to improved functionality and user experience. Introduced enhancements to the interface of development platform, leveraging innovative solutions and best practices to streamline workflows using **Python, Django, ReactTS, Postgres, AWS**
- Collaborated closely with designers and quality assurance (QA) teams throughout the development lifecycle, ensuring **design alignment specifications** and thorough testing of features for optimal performance and usability.
- Successfully integrated new features and modules into existing applications, ensuring seamless integration and compatibility with existing systems. Demonstrated **strong problem-solving skills** and adaptability in addressing complex technical

Software Developer

SUNARP

Arequipa, Perú

Jun 2021 - Dec 2021

- **Role Management System:** Led the design and implementation of a comprehensive user and role management system creating an intuitive administration interface that allowed administrators to easily and accurately assign roles and permissions using **Angular, NodeJs, Express**.

FullStack Developer

BeetleCraft

Arequipa, Perú

Sept 2020 - Feb 2021

- **SitSmart:** Mobile and Web platform to manage the tracking and monitoring of vehicles. Collaborated in the development of vehicle tracking by mobile device allowing users to track vehicles with real-time accuracy, resulting in greater efficiency in fleet management using **Python, Django, ReactJs, React Native, Postgres**.

Education

B.Sc. in Computer Science

San Pablo Catholic University

Arequipa, Perú

March 2017 - 2022

Projects

Sales Record Application

Frontend and Backend Project

Project on Github (Private)

Jun 2023 - Jul 2023

- Sales Record System to store and create new sales for restaurants
- **Technical Skills:** Python, Django, Postgres, React, Typescript
- **Youtube url:** <https://www.youtube.com/watch?v=0xecKoz-RyA>
